

DISINFECTION STATION - Hygiene in the corona crisis

Dear Ladies and Gentlemen

In times like these we all have to help each other. We must be careful and not let the current situation get us down and together we will succeed. The first and careful steps of opening the retail trade back up now result in the challenge of complying with hygiene regulations and recommendations.

ConRail has in conjunction with our partner CP-FoodTec designed a DISINFECTION STATION based in a 10' container that allows e.g.

The disinfection of shopping trolley handles including the hands of the user without tying up valuable human resources. Furthermore, the function as a sluice supports and aids a well organised and thorough disinfection procedure.

Equipped with a robust PVC floor, a spray bar, turnstile operated hand disinfection, an area for people and e.g.

Shopping trolleys as well as ramps for easy access in and out of the disinfection station.

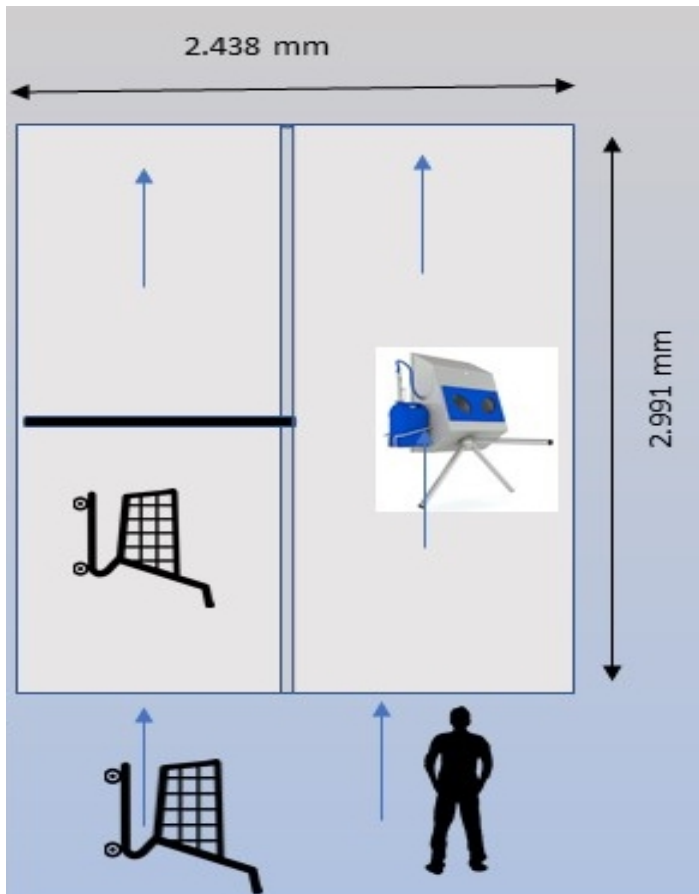

The quality of our station sets us well above the standard in this market.

E-Mail: info@cpfoodtec.de

The container serves as a walk-in walk-out room, in which the disinfection of objects and hands can be safely and thoroughly achieved.

Additional equipment like e.g. face mask dispensers are also available on request.

Should you also require additional ambient or climate-controlled storage facilities (HACCP) and (GMBP) we can also be of service in these areas.

Please take advantage of our offer and help to protect everyone's health whilst bringing the economy back to life gently and carefully.

ALL THE BEST - YOUR CONRAIL TEAM
